

Deseret Unicode Keyboarding System

Samuel R. Boylan Jr., © 2008

This keyboard is designed to enable simple input of all the Deseret Unicode characters.

The small letters are shown in the table below, for capitals use the corresponding capital keys. All other keys have their normal function so that numbers, etc. are not affected by this encoding.

Deseret	Name	Keyboard	Deseret	Name	Keyboard
᠗	Long I	ii	᠗	BEE	b

Some fonts that has Deseret Unicode characters: Code2001, DeseretBee, Damase, QueenBee, QueenBee Star, TimesBee, TuBee Blunt, TuBee Blunt Hollow Light, TuBee Blunt Hollow Medium, TuBee Blunt Shadow, TuBee Round, TuBee Round

Hollow Light, TuBee Round Hollow Medium, TuBee Round Shadow, TumbleBee, ZarahemlaBee.

The letters change as you type as needed; for example, when you type the first i it turns into † and then when you type the second i the † turns into a. The \ key can be used to prevent the above from happening and force a, e, g, h, i, o, u, w, y encoding as a separate letter (see table below for examples).
