

Typing in Harari

The Harari keyboard (**ሐ**) provides *only* the letters used in Harari. It uses a system whereby the Harari sounds are matched to the English letters (a style called “phonetic”). You can think of how a word sounds in Harari and then type it out with English.

Example: typing **selam** becomes **ሰላም**

Because Harari has more sounds than English does, we sometimes have to adjust this rule. For example, English does not have ‘**m**’ and the the closest similar letter would be ‘**t**’. In this case you should type with “capital T”:

Example: typing **TienaysTIN** becomes **ጤናይስጥልኝ**

When the letter you want to type does not appear when you hit the similar sounding key in English, try using the capital next. If typing the capital does not work, then try hitting the key two times:

Example: typing **sselam** becomes **ሠላም**

Example: typing **SSeHey** becomes **ፀሐይ**

Next, when you need to type the extra letters of used by languages like Amharic, for example **ሏ**, **ሟ**, **ኳ**, etc., you can do so by typing an extra vowel after a ‘**u**’:

Example: typing **lua** becomes **ሏ**

Example: typing **mua** becomes **ሟ**

Finally, we must introduce a special rule for ‘ (apostrophe). Some words are spelt with a **ሓድስ** (6th) letter followed by a vowel, like **ሮኤ** in **ገብርኤል**. We use the apostrophe here to type “gebr’iel” to make sure we get “**ሮኤ**” instead of ‘**ራ**’.

Example: typing **mel'ak** becomes **መልአክ**

Example: typing **m'Eraf** becomes **ምዕራፍ**

If an apostrophe, ‘**’**, is needed after a **ሓድስ** letter in your document, type it twice like:

Example: **k''** to produce **ክ’**

The following typing tables show how to type all Harari letters, numbers, and punctuation.

Harari Typing Table

ቤተሰብ	ግዕዝ	ካዕብ	ሣልስ	ራብዕ	ኃምስ	ሳድስ	ሳብዕ	ዘመደ-ራብዕ
ሆይ	ሀ he	ሁ hu	ሂ hi	ሃ ha	ሄ hie	ህ h	ሆ ho

ፕሳ	ፕ pe	ፕ pu	ፕ pi	ፕ pa	ፕ pie	ፕ p	ፕ po	ፕ pua

Consonant and Vowel Marks

Dots can be added above letters to indicate a stressed vowel or consonant using “CTRL + .”. For example:

- አባ CTRL . ⇒ አሳ (“abaa”, “a” is stressed)
- አሳ CTRL . ⇒ አሻ (“abba”, “b” is stressed)
- አሻ CTRL . ⇒ አሻ (“abbaa”, “b” and “a” are stressed)

Typing Punctuation

Ethiopic Punctuation

፡	።	፣	፤	፦	፧	፨	፩	፪
:	::	,	;	:-	,,	??	:+	:#

◀	▶	◀◀	▶▶
<	>	<<	>>

Period, ‘.’ may also be used to enter ‘፡’. When a number follows ‘፡’, ‘፣’ and ‘።’ they will change back to their Latin form automatically. For example:

123፣456 ⇒ 123,456

12።50 ⇒ 12.50

12፡50 ⇒ 12:50

Keyboard Punctuation

All regular punctuation on your keyboard remains available. Most punctuation can be typed with a single keystroke as usual. Those used to input Ethiopic symbols can be entered by hitting the punctuation key two or more times until it appears.

Typing Numbers

The hash mark is used Ge'ez numbers, so #1 becomes ፩ and so on. When a ‘#’ is needed before a number in your document, just type # twice.

Ethiopic Numerals

፩	፪	፫	፬	፭	፮	፯	፰	፱			
#1	#2	#3	#4	#5	#6	#7	#8	#9			
፲	፳	፴	፵	፶	፷	፸	፹	፺	፻	፷፻	፷፻፹፻
#10	#20	#30	#40	#50	#60	#70	#80	#90	#100	#1000	#10000

Numeral composition will continue as 0s are entered up to ፷፻፹፻ (100,000,000).

The “connected” style of Ethiopic numerals can be created by changing the font from “Abyssinica SIL” to “Abyssinica SIL Connected” as seen in the following table:

Abyssinica SIL	Abyssinica SIL Connected
፲፱፻፹፻	፲፱፻፹፻
